

Consulting Locally, Providing Globally

Radio frequency jammers are an extremely useful piece of equipment which can be applied to many different scenarios, such as VIP protection, military security operations, the protection of classified information and much more.

At ASDC, we offer a wide range of state of the art jamming technology, which can be tailored to meet your specific needs.

High- power portable DDS multi-band jamming system

This state of the art, high power DDS jamming system implements the most effective and reliable drone jamming technology.

It is equipped with a fully-integrated broadband jamming system offering:

- Simultaneous and continuous drone jamming, ranging from **20MHz –6GHz**, covering all potential bands that any drones could be operating on., as most frequently, drones operate between **2.4GHz–5.8GHz**
- Easy to use and install with a friendly user interface
- Fully portable and lightweight and equipped with a remote control unit
- Can be vehicle mounted

Wi-Fi GPS Portable

Wi-Fi Portable is a portable drone jammer, which comes in 2 variations:

- portable drone jammer
- portable GPS jammer.
- Jamming coverage of all bands that drones could be operating on, which is commonly between **2.4GHz–5.8GHz**
- Easy to use and install with a friendly user interface
- Can be vehicle mounted
- Antennas: high gains Omni- directional antennas as standard
